CEO MESSAGE

Mr. Bilal Ahmed

The most challenging aspect of fashion world is its dynamic nature and ever changing trends. It's not something where you build up once and profit continues. This field requires us to work tirelessly with full zeal and zest in order to bring incontinuous innovation and creativity. This philosophy of innovation flows down in Team Hunbuffex from top management to the grass root level. To survive and excel in such a fast paced industry becomes even more challenging in the presence of vigorous competition. We take this challenge positively by placing high emphasis on building up long-term relationship with all stake holders, both internal and external. Having strong relationships with some of the industry's best quality suppliers enable us to deliver consistent quality as well as cost efficiencies.

Our prime objective is to achieve customer satisfaction and this attitude is towards all clients irrespective of the business volumes involved. Once you bring your requirements to us, it is then our responsibility to materialize customer aspirations into final product. As a result we enjoy an ever growing delighted clientele.

My rationale is ***"There is no less demand of work till you are fulfilling client dreams"***.

We strive to exceed customer expectations by ensuring highest level of services, quality, in time delivery and cost efficiencies through philosophy of continuous improvement and creativity.

MISSION

We strive to exceed customer expectations by ensuring highest level of services, quality, in time delivery and cost efficiencies through philosophy of continuous improvement and creativity.

VISION

Our aim is to take lead in global textile industry as the ultimate one-stop solution provider while playing the positive role in region's economic and social forefront.

“WE TAKE PRIDE IN INNOVATIVE DESIGNS AND QUALITY PRODUCTS”

HunbulTex started its successful journey back in the 90's with a humble beginning of textile trading services. In 2005, company established its own setup by setting few Multiheads embroidery machines. Today, HunbulTex has expanded itself to state of the art 100 machines embroidery unit. In early 2010, management of HunbulTex planned to start processing business to become market leader of Pakistan Processing Industry. Now HunbulTex has its own processing setup of flatbed, rotary and digital printing as well as on demand greige supply services along with in-house dyeing and finishing facilities. In a very short span of time the company has achieved a milestone of annual sales turnover of USD 8.94 million.

Our Dyed and Printed finished woven fabrics are produced to meet standards of national and international retail chains. Regular and Digital Printing is our primary business with company owned latest machinery making us one of the largest suppliers of printing services in Pakistan.

Our core strength is our highly motivated, trained and qualified team; committed to achieve the quality and production goals. Integrity, commitment and quality are deep rooted in our corporate culture, values and beliefs. Our team is proved to be challenged for any task related to our business.

HunbuTex is socially responsible company complying with all labor laws of Pakistan and ILO standards. We are backed with world renowned certifications including ISO 9001:2008 Quality Management Systems and ISO 14001:2004 Environmental Management Systems.

With an experience of almost two decades, HunbulTex stands committed to innovate continuously in the field of textile, producing world class articles which are futuristic and have competitive prices.

The foundation of HunbulTex had been laid specifically to develop a single window solution for buyers and to satisfy their needs. At this pedestal, we have tradition of commitment, trust and value. HunbulTex is equipped with young but experienced and innovative professionals to meet every day as well as long term challenges. For us, customers come foremost and we pay special attention to understand the specific needs to ensure that the final product meets its requirement.

Owing to its loyal efforts, today HunbuTex is considered to be a part of Textile giants in terms of quality products, services and management skills. The company successfully identifies itself as one of the best sources of fancy fabrics within the region, providing all types of textile services, from yarn import/export to finished fabric. It has production facilities including but not limited to :

- Digital Printing
- Conventional Printing (Rotary & Flatbed)
- Embroidery
- Processing
- Dyeing
- Designing
- Greige Fabric Supply

We at HunbuTex are able to entertain our customers most efficiently, are always determined to learn new techniques and strive to provide the right quality to all customers at the right time and at the most favorable terms.

HunbulTex established first ever digital textile printing in 2013 with affiliation of MS printing solutions Italy. It was great honor for us to have first industrial digital textile printing in Pakistan. HunbulTex is now equipped with the world-class digital printing machines manufacturers, such as efi-Reggiani and MS.

Outstanding productivity, accuracy and performance, the Renoir Top K32 from efi-Reggiani are equipped with 32 heads and are available in 1.8 meter printing width which is the perfect solution for large production needs.

HunbulTex is the premier manufacturer of digitally printed fashion fabrics in Pakistan and is continuously breaking new grounds in the textile industry. As a part of our continuous commitment to develop comprehensive yet simple solutions to the digital printing industry, we are adding a new project to print polyester with direct dispersed inks and are expanding it by deploying two game changing Reggiani digital printing machines (K-32). Three more digital printing machines with reactive/dispersed inks are also a part of this expansion project.

HunbulTex is offering a combined capacity of 16,000,000 meters per month of digitally printed fabric with current setup of 8 state-of-the-art digital printing machines. Our production capacity will be increased after addition of above mentioned 5 machines upto 28,000,000 meter per month or above.

It is imperative to convert design/desire into reality with the desired look and desired feel while keeping the cost convenience in consideration at the same time. Thus, customers' demand for conventional and cost effective printing solutions has its own significance. In order to become one stop solution provider in true sense, HurbullTex do offer its services in conventional printing as well.

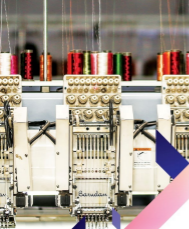

We are equipped with Rotary 12 color and Flat Bed 14 color printing setup with the capability of producing 9 million meters/year. The setup is further strengthened by our team of expert designers who ensure the smooth services to achieve consistency and innovation.

HunbulTex has a dedicated product development department with specialist designers who are capable not only to replicate customer's designs but also create and develop new designs for export and local markets.

Embellishing fabrics with a needle and thread has become most popular and best technique to attract clients from national and international markets. HunbulTex is a trust worthy name in textile and fashion industry having a setup of most advanced multiheads embroidery machines such as Barudan, Great, SWF and SWM. We offer embroidery services on variety of fabrics such as Viscose, Cotton, Metallic, Polyester Yarn etc.

Furthermore we have a team of professionals, designers and technical staff with standardized working system. We are in a continuous process of expansion, enhancement and incorporating the latest technological innovations in order to ensure our customers the best possible quality of embroidery.

Processing has the most important role in adding physical and aesthetical attributes to the end product. HunbuTex owns one of the most modern fabric processing facilities in Pakistan. With a selected range of leading edge technology and state of the art machinery, it has the combined capacity to produce 23 million meters annually of dyed, finished and printed fabrics.

It is specially designed to handle light weight and delicate fabrics between 20 to 200gms. The advantage achieved by the latest processing setup is the result of an extensive research work with the help of world renowned machine makers. To ensure that our customers get the very best we use majority of our dyes and chemicals from Branded suppliers of top notch quality. Through automation, our plant is engineered to achieve maximum productivity and efficiency for fashion driven products maintaining highest industry standards at the same time.

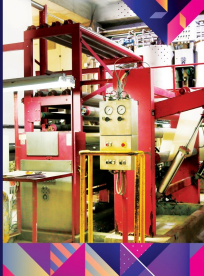

Dyeing production at HunbuTex was started in 2012, top of the line European machinery is capable of producing 3 million meters per annum of cotton and cotton blended finished fabrics.

At HunbuTex we constantly experiment in color creativity resulting in a wide assortment of products to choose from. From soft pastel hues to deepest shades, from soothing brightness to radiant and vibrant tones, we take pride in replicating nature's most subtle shades in our fabrics.

Be it an abstract idea from customer or an innovative suggestion from our own design team, we have the capability to convert it into physical product.

HunbulTex is capable of doing a wide range mechanical and chemical finishes including Nano resist spills, Teflon, water repellency, wrinkle free procure & post cure etc.. HunbulTex also enjoys exclusivity in the treatments of PU coating and blotch printing. Our finishing facilities are considered to be the best in the region with versatile techniques and hardware.

In addition to other services, HunbuTex operates a state of the art in-house design studio for its valued customers. Our team of professional designers draw imaginative ideas of our customers into reality. Every team member loves designing and is passionate about creativities. We at HunbuTex are capable of create new designs, arrangements, settings modifications of existing designs.

In addition to processing services, HunbulTex can also arrange for greige fabrics of right quality on customer demand. We have the strong relation with weavers to manage smooth supply of plain, canvas, twills, drills, satins and dobby textures. Our strong command on formulation enables us to choose best quality greige fabrics for you.

GREIGE FABRIC

Quality is what we aspire to deliver both in products and services we offer. HunbulTex has documented quality manual that states the quality management system of the organization. Management establishes a documented policy and plan setting-out the specific quality practices, resources required and the sequence of the activities relevant to particular products. Our Quality Assurance Department works in parallel with the production department and is divided into two main following wings.

- **Testing**
- *Inline and Final Inspection*

Testing

It consists of Quality Assurance lab equipped with all testing facilities required for textile processing, chemicals and water analysis. All the incoming raw materials either chemical or greige fabric are tested in the lab. Testing standards used in the lab are internationally accepted (AATCC, ASTM, ISO etc) such as the criteria for acceptance or rejection of incoming materials are purely based on our internal use.

Inline and Final Inspection

It is carried out at every stage of processing with well trained qualified staff so that quality is ensured throughout the process. QA department is trying its best to fulfill the requirements of its customers.

QAD as a whole plays vital role in customer retention, market value of the company and quality certification. HurbulTex has a stringent check over product quality and as such is equipped with a technologically advanced lab to ensure that compliance of various standards is met.
